## NOTES:

Sealine International launched its “flagship” Sports Convertible in 2007. It is both stylish and extremely practical with Sealine’s modern design philosophy with spacious indoor and outdoor entertaining areas.

The exterior is characterized by its panoramic sports windscreen and large opening roof system. The unique canvas roof has a manual and electric operating system which transforms the cockpit to a fully enclosed space.

Safety and efficiency are the key parameters. It has an open plan cockpit, lounge-style seating for up to 10 and a large folding cockpit table for al fresco dining and a fully equipped cockpit galley. A central stairway leads to the lower deck which is flooded with light from a large skylight.

The full light filled beam master suite has en suite shower and toilet with a king sized double bed accompanied by a chaise long which can act as an additional berth plenty of storage. The forward cabin has a large double bed and separate shower compartment to port and WC to starboard side.

The wide beam gives stability and the crisp lines provide a safe and stable ride at all speeds. The Zeus engine propulsion system and its 360-degree Joy Stick control combines high performance and exceptional maneuverability.
